The treatment process includes reverse osmosis membranes, which produce a reject water (brine) that requires disposal. The brine is disposed of via deep injection wells; ECCV currently operates two deep injection wells, but is planning to construct additional wells (DI-4, DI-5, DI-6, and DI-7) to accommodate the existing injection wells reaching their useful life and an increased water treatment plant capacity. ECCV's future deep injection wells and pipelines are shown on Attachment 1.  This DI-4 Brine Pipeline project includes design and construction of approximately 5 miles of 12-inch PVC pipeline from ECCV's water treatment plant to ECCV's DI-4 deep injection-well site located southeast of the intersection of E 136th Ave and Harvest Rd. The property is owned by ECCV. The DI-4 pipe alignment, shown in Attachment 2, is proposed to be located in Adams County right of way, primarily under paved roadway. The alignment runs east along E 160th Avenue to Harvest Rd, and south on Harvest Rd to the well site. The pipeline will be buried a minimum of 4.5 feet below grade.
